New York, Feb. 10.—The weekly banks statement shows the following changes:
\$2,264,500; legal tenders, decrease \$2,373,700; loans, increase \$2,284,500; legal tenders, decrease, \$1,859,000; circulation, increase \$163,300.

The banks now hold \$27,897,575 in excess of the requirements.

New York, Feb. 10.—The movement of prices in the Stock Exchange had little significance to-day, as operations were largely confined to the closing up of contracts by the professional element. There was a contluation of realizing sales at the opening, in spite of the tranquility with which the latest news from South Africa seemed to be accepted by the London market. New York, Feb. 10.—The movement of prices in the Stock Exchange had little significance to-day, as operations were largely confined to the closing up of contracts by the professional cilement. There was a continuation of realizing sales at the opening, in spite of the transpolity with which the latest news from South Africa seemed to be accepted by the London market. The rally in the market after the bank statement appeared made it evidents, and the longity of short account in anticipation of an unfavorable statement.

The rally did not mean necessarily that the statement was considered favorable, but simply that the bears desired to cover their short contracts before the two holidays pending. There was rather acute weakness at times in St. Paul, Missouri Pacific, Western Union, Burlington and Sugar, The movement of prices was rather erratic, but the net changes of the day are small and mixed with the majority on the side of lesses. The closing of the market was strong at the rally on short clear, 11.554.00. See Stock 11.254.00 increase this comparise during the ourse of last year did he loan expansion renef \$16,00,000. In the owek ending February 4, last year and perplexed. The enormous loan expansion renef \$16,00,000. In the owek ending February 4, last year did he loan expansion renef \$16,00,000. In the owek ending February 4, last year, loan were increased \$15,154.40, due to the active flotation of new industrial commercials, then in full force. This compares with \$21,152.400 increase this week. Since January 1, loans have been increased \$44,496,500, compared with an increase of \$33,197.300 in the corresponding period of last year, when specular companies during the course of last year, are now coming back to the banks. There is nothing in the regular course of business or speculation to account for the recent great extension in the loan item of the Clearing House course of business or speculation to ac-count for the recent great extension in the loan item of the Clearing House banks. Returns of bank charings by telegraph for five days to the Financial telegraph for five days to the Financial Chronicle show a sharp falling off at the four principal Eastern cities, and increases at Chicago and St. Louis in considerable proportion, while at New Orleans the increase over last year is nearly 46 per cent. At other places the increase is over 10 per cent. The increase in the South is doubtless due largely to the activity in the cotton market, and is suggested of the future demand upon New York for funds from that section. But the clearing house returns only serve to perplex the problem of the phenomenal loan expansion of New York banks.
